

NTS HOME OFFICE SOLUTIONS

The home office solution by NTS targets an intelligent, modular as well as a secure workplace. You are in experts' hands not only with regards to the right hardware strategy, but you also receive comprehensive advice thanks to the flexible set-up of our solution.

NTS accompanies you from the development of a strategy, via the implementation and the introduction all the way to the operation of your home office environment!

Relax, We Care.

VPN CONCENTRATOR AND CONNECTIVITY

The VPN concentrator in the company is designed depending on the amount of home workers (home offices). The concentrator ensures a secure data connection between the company and the home offices. Only authorized devices are allowed to connect with the company network.

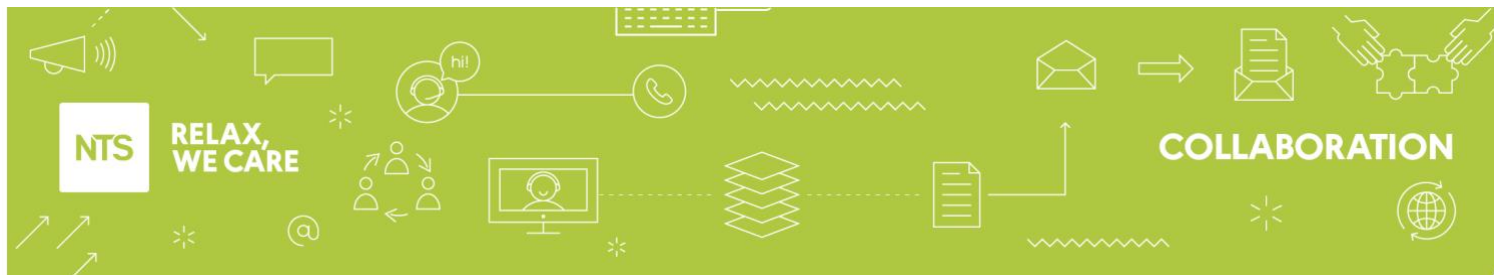

Everything is possible: from a simple, existing internet line up to two internet lines and an LTE connection. A suitable connectivity package can be selected, depending on the reception in the home office. NTS recommends a redundant connection in order to protect the home worker from possible internet outages of a provider. The VPN concentrator as well as the home office connection is designed with Cisco Meraki solutions. Thus, configuration changes and troubleshooting can be managed centrally at any time in a user-friendly manner.

CALL. MEET. SHARE. TOUCH.

From the virtual meeting room all the way to the digital white board? You have the choice in the areas of telephony and video as well! We support you from a simple audio connection up to the premium package of **Cisco Desk Pro**. This package also ensures a data protection conform video appearance by means of a possible hiding of the background next to exciting white board functions. Use the large selections of headsets and desk phones in order to perfect your individual, digital world of experience.

SUPER SERVICES INCLUDED

All hardware components include a proven NTS basic support. Faulty devices will be replaced quickly in a straightforward manner in case of a defect.

How do I want to phone?

- Desk phone
- Headset

How do I design my video conferencing?

- I use my **laptop** for it
- I desire a **video conferencing system with white boarding**
 - 24-inch monitor (full HD resolution); sketches and presentations via white boarding
- I would like a **data protection conform video conferencing system with white boarding**
 - 27-inch monitor (4k resolution); sketches and presentations via white boarding; data protection conform meeting appearance thanks to background hiding

Do I want a tailor-made “VPN concentrator” solution?

- 0 – 40 home office workers
- 41 – 90 home office workers
- 91 – 450 home office workers

- Licences for collaboration devices (desk phone, soft phone, video conference...) are not included and need to be obtained separately.
 - Internet connection(s) as well as LTE provider cards are not included and need to be provided by the customer.
 - Implementation activities, installation work, cabling activities as well as troubleshooting are excluded.
 - The logistics to the home office is not covered by NTS and it is excluded.
 - The solution is a cloud solution. Optionally, the concept can also be acquired without involving a cloud.
