# MANAGED SERVICE INFRASTRUCTURE SECURITY

Cyber-attacks are not only increasing, but they are also becoming more manifold and complex. Every day, hackers attempt to steal business critical data or digital identities and they also try to hack networked organizations. It's not so much a question of whether a business will fall victim to potential attacks, but when it will happen.

## COMPREHENSIVE AND CAREFREE WITH NTS

A highly available security infrastructure is essential so that one is fully prepared in the best possible manner for the dangers of a cyber-attack. Thereby, it is crucial to have a constant overview of the infrastructure in order to ensure that the systems in use are up to date.

The NTS Managed Service Infrastructure Security resolves this issue with a comprehensive portfolio of state-of-the-art security products. In combination with our Super Services, this leads to a comprehensive solution that ranges from the selection of components all the way to complete operation and maintenance of an individual security solution.

## THE ADVANTAGES

**Access to expertise** – Very often it is difficult and expensive to recruit IT security specialists. However, highly trained and certified experts are available for you around-the-clock with a Managed Service by NTS.

**Binding service level agreements** – „Relax, We Care“, from receiving a query all the way to the processing by an experienced NTS engineer. We ensure that specified activities are also being completed! \*

**Advantage in knowledge** – Continuous technological improvement and a wide-spread range of knowledge turned NTS employees into true security professionals.

**Easily calculable costs** – The total package caters for a clear cost structure that render expenses and budgets predictable.

**Modular design** – With NTS you receive a Managed Service package that is individually adjusted. The required security products can be chosen as a modular design that covers your taste and needs. If requested, even including NTS Defence Services (NTS Vulnerability Management and NTS Threat Detection | SIEM).

**24/7 monitoring** – NTS professionals proactively look after fault finding and troubleshooting. Around-the-clock. By permanently monitoring the IT infrastructure including all security components, faults are not only removed, but also discovered at an early stage.

**More time for core business** – Hand over the responsibility and you will obtain more time for your core business without having to worry about lost data or uninvited guests.

## NTS DEFENSE SERVICES

Whilst the NTS Managed Service Infrastructure Security takes care of the operation of the security-related infrastructure, **NTS Defense Services** offer the ideal addition to the active detection and combating of threats.

\* At Cloud products, the SLA availabilities of the service depend on the manufacturer.

**RELAX,  
WE CARE**

You're never left alone as we assume the responsibility for monitoring your systems, processes, and their analysis. Precisely to the extent that you require, just in that style that you desire.
