

NTS SECURITY SERVICES

FIREWALL AS A SERVICE

RELAX,
WE CARE

**NTS**

FIREWALL AS A SERVICE

FIREWALL AS A SERVICE provides tailor-made firewall infrastructure for a clearly defined and uniquely economic package price – no investment required. From the beginning, the entire package is invoiced at a monthly special price. OPEX instead of CAPEX is the motto of the day.

If required, additional licenses can be activated to individually increase the range of functions for the firewall. If requested, a highly specialized team at NTS takes over the complete operation of the firewall within the framework of a Managed Service. Therefore, a flexible and comprehensive basis for your „security as a service“ is created.

FIREWALL AS A SERVICE

Next to highly effective firewalls, the offer also includes implementation, continuous support, a management platform, all required licenses as well as an inventory platform that provides full transparency across the entire network inventory including the firewalls.

YOUR ADVANTAGES AT A GLANCE

- OPEX instead of CAPEX
- Promotional prices
- Plannable costs
- Support in the case of problems
- Inventory of the firewall and the network
- RELAX, WE CARE: optional transfer of the operational responsibility to NTS

* The package prices are non-binding examples. Pricing varies as each package is tailored to the customer. The selection of the appropriate firewall is made in collaboration with NTS experts and depends on factors such as the expected network traffic. The promotional prices shown are for new Cisco Firewall customers. Offer valid until 01/25/2025.

RELAX, WE CARE

Have we attracted your attention? We offer you tailor-made solutions and individual support. We are always here for your questions. Thus, you can continue to focus on your core business, while we develop future-oriented solutions for you.

FIREWALL AS A SERVICE

WHAT IS INCLUDED?

IMPLEMENTATION

Firewalls need to be appropriately configured so that they function correctly in complex networks. NTS takes care of the configuration as part of this service.

FIREWALLS

NTS happily offers advice and recommends the suitable Cisco firewall depending on network traffic, size and complexity of the network. The firewall will be provided with all the required licenses. A management platform for the administration of the firewalls is included as well.

NTS STANDARD SUPPORT

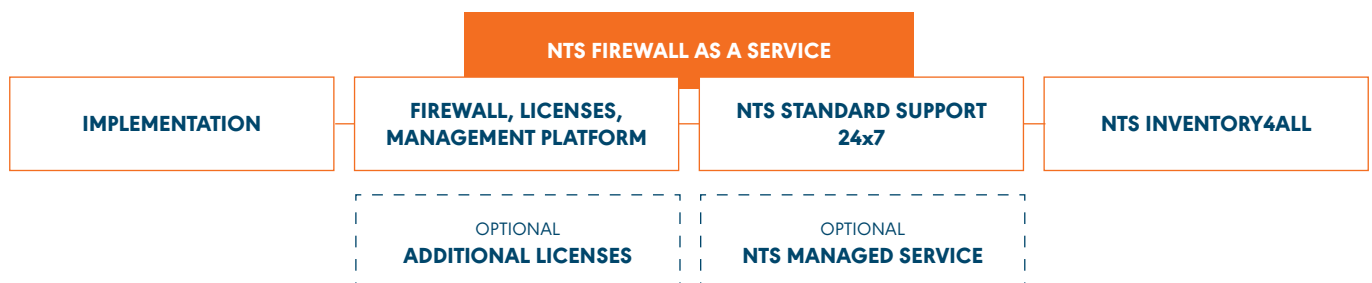

The firewalls, licenses and management platform include NTS standard 24x7 support. Here, a specialized team as a single-point-of-contact is available around-the-clock at NTS. The team takes over the remediation of faults as well as the provisioning of possible software updates. In case of a malfunction, the device will be exchanged within set SLA time periods.

NTS MANAGED SERVICE (OPTIONAL)

Upon request, the entire operation of the firewalls can be outsourced to NTS. In that case, NTS proactively ensures that the firewalls are always kept up-to-date and that the network protection is always safeguarded – true to the motto „Relax, We Care.“

NTS INVENTORY4ALL (I4ALL)

This NTS development enables the inventory of the network equipment and the firewalls. The devices are clearly displayed in the NTS portal and, depending on the NTS Support status, they are supplemented with relevant information, such as the current software status. Thus, effective asset management is enabled, which provides a complete overview. That way, plans can be simplified, and necessary adaptations can be detected at an early stage. I4ALL can be extended flexibly, like for instance by the Vulnerability Module that identifies vulnerabilities in the inventory. Furthermore, the optional NTS NIS package offers additional support during the implementation of the NIS2 guideline.
